

Chief Pontiac Trail Patch Placement

Note the placement of the service segment at the bottom of the Lil' Brave center. All other segments may be placed in any other position.

After a scout has earned one service segment, all other service segments earned are placed around the service project center patch (orange.) The service segment must be earned before the Lil' Brave center patch can be completed. After that, segments are placed around the Brave center. After the Brave center is complete, segments are placed around the Lil' Chief center.
